github.com/Ankomahene | linkedin.com/in/shadrack-ankomahene-5a393311a

Software engineer with 6+ years of experience building enterprise web platforms and business applications. Specializes in React, TypeScript and Angular, with experience in API discovery, deployment tooling and data-rich interfaces on a Morgan Stanley assignment through Turntabl. Recent work spans property management, desktop business software and full-stack products using Next.js, NestJS and PostgreSQL.

Technical skills

Frontend: React, TypeScript, JavaScript, Next.js, Angular, HTML, CSS, Tailwind CSS, TanStack Query, Zustand

Backend and data: Node.js, NestJS, REST APIs, PostgreSQL, Supabase, Firebase

Testing and delivery: Git, Jest, Cypress, React Testing Library, CI/CD, Jenkins, GitHub Actions

Selected engineering experience

Voltbase | Frontend Engineer

Mar 2025–present | Swiftbuild project collaboration

- Developed the Swiftbuild frontend from initial setup using Next.js, React and TypeScript for a property-management application.
- Integrated authenticated API workflows for property units and tenants, including invitation flows, profile updates and file uploads.
- Extended rental and inventory interfaces with dual-listing support, payment integration and document-signing workflows.
- Collaborated through pull requests and review feedback, refining interfaces after product demonstrations and coordinating API integration.

Turntabl Ghana Limited | Software Engineer

Oct 2019–Dec 2024 | Morgan Stanley client assignment: Feb 2020–Dec 2024

- Built frontend features for an enterprise API marketplace and developer portal using React, TypeScript and Angular, supporting API discovery and integration.
- Implemented self-service API deployment tooling for Azure, including API policies, semantic versioning and OpenAPI specification validation.
- Developed an API usage dashboard with interactive charts and filters by client, application and HTTP response code, using Azure Application Insights data.
- Improved frontend responsiveness through request reduction and caching; contributed to shared Angular/TypeScript libraries and parallel build pipelines.
- Worked on automated tests and release processes; delivered React training, reviewed code and mentored frontend engineers.

Additional product and client experience

Faithtower Media Technologies | Founder and Software Engineer

Jan 2025–present | Earlier freelance work alongside employment since 2020

- Build business applications and client websites, translating requirements into interfaces, integrations and maintainable software.
- Developed React/TypeScript desktop applications with Electron and Supabase, including Print Calc Pro for printing businesses and Stock Flow for inventory management.
- Worked on desktop packaging and release fixes for Print Calc Pro, and attendance and geolocation interfaces for ChurchHub360.
- Built a NestJS backend with Supabase integrations and a web/admin frontend monorepo for FMT Software Solutions.
- Built and continue to maintain websites for iSmart NGO and Africa Is Great, handling client requirements and ongoing updates.

Ndel Technologies Ltd | Frontend Engineer

Contract engagements: Jan–Feb 2026 and Apr–May 2026

- Developed patient-facing BawaHealth interfaces for appointments, payments and telemedicine, including Daily.co video-consultation integration.

KreeoAI | Full-Stack Engineer

Nov 2025–Mar 2026

- Developed KreeoSync, a Figma plugin and web dashboard, with React, TypeScript, NestJS and PostgreSQL/Supabase.
- Integrated Figma authentication and AI-enabled case-study and speech features into the product workflow.

Selected additional project

Kobox | Group contributions and savings records

Developed a mobile application using Expo, React Native, TypeScript and Supabase for group dues, welfare contributions and rotating savings, with records of manually entered payments and balances.

Education

University of Cape Coast, Ghana

Bachelor of Education (Computer Science), 2015–2019
Second Class Honours, Upper Division

Teaching and community

Global Code summer programme instructor, University of Ghana, 2019. Returned as an instructor after participating in 2018.

Developer Student Club co-lead, University of Cape Coast, 2018–2019.
